

Stand Fast Packaging Products, Inc. Installs Marumatsu Vantage Flat Bed Die Cutter

Addison, Illinois based Stand Fast Packaging Products has recently installed a new 43" X 63" Marumatsu Vantage Die Cutter. This is the third installation of the revolutionary Vantage Die Cutter in North America.

"This machine is amazing. Our operators were running it at top speed the first day," says Jay Carman of Stand Fast Packaging. "We looked at a lot of machines before we bought the Marumatsu and we decided the Vantage, with its one die set up and 100% stripping, was the machine for us. In addition the machine was the most robust of all the machines we looked at. In this tough market, the Vantage has made us competitive and we are adding new business every day."
